IV PROJECT INFORMATION

E.) Inter-Municipal Move Determination

Trek, Inc. has been leasing space at 160 Washburn Street in the City of Lockport since 2014. As operations have grown the existing space has become limiting based on 32,000 square feet of space per floor, meaning the only expansion opportunities are vertical (which is impractical), the small loading dock, an antiquated freight elevator, the column spacing that accompanies older manufacturing facilities and impedes workflow, and limited parking in the area.

Now that Advanced Energy has acquired Trek, the company wants to establish a base of production in the northeast, and the Cambria site could potentially be that base. The new 110,000 square foot facility could accommodate existing operations and the short-term growth. Additionally, the site allows for another 100,000 of expansion to accommodate mid to long-range needs. New construction is a requirement, and the Cambria site is the closest and best available option to maintain the existing employment base while allowing the company to grow at a much greater rate.

IV FINANCIAL ASSISTANCE REQUESTED

C.) Financial Assistance Determination

While Advanced Energy could support the lease, associated property tax payments, and sales tax expense of locating in Cambria, the decision to stay in Niagara County would be at a competitive disadvantage without IDA assistance. Advanced Energy is relocating production out of the City of Lockport no matter what, and is choosing between 4 options:

- 1) the Cambria site
- 2) a site in Erie County
- 3) Fort Collins, Colorado near AE's corporate headquarters
- 4) Malaysia, near existing Asian operations

The company's preference is to grow a Northeast production presence and would like to retain all of its existing employees, so Cambria is the top choice, however the project has to make financial sense and stack up at least reasonably well against the other options. As a result, IDA assistance can tip the decision.

Part 3 - Determination of significance. The Lead Agency is responsible for the completion of Part 3. For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.
